

## Exhibit 8 False attributions

Defendants Bendebury and DeLay inserted the following comments in several of the pages of their [Demystifying Science blog](#) (The articles are listed in [Exhibit 9](#)).

1. [What Does It Mean For Something To Exist In Physics?](#)

<https://demystifyingscience.com/blog/2020/3/12/exist-vs-occur>

*“The word ‘exist’ is central to many, if not all, scientific discussions yet is almost never defined unambiguously and then utilized in such a consistent fashion that it can be applied across subject matters without contradiction. Bill Gaede first brought this issue to my attention in 2017.”*

2. [What is a Photon? What is Light?](#)

<https://demystifyingscience.com/blog/photon>

*Entwined e-shells can be termed “photogravitational helix” for this reason. These PGHelices will be invoked to physicalize gravity in an upcoming post.*

*\*\* The atoms illustrated above are made of fiber, which is consistent with empirical findings, unrelated to Bill Gaede’s thread world.*

No attribution was made in the related article titled:

[Why Is Light Speed Limited?](#)

<https://demystifyingscience.com/blog/2020/2/21/why-is-light-speed-limited>

3. [How Does Electricity Work?](#)

<https://demystifyingscience.com/blog/how-to-visualize-electricity>

*To address these shortcomings, we build on an idea first proposed by Bill Gaede in the mid-2000s: Electricity as surface-to-surface rotational gearing between electron-shells on atoms (see **movie** below).*

4. [How Do Magnets Work?](#)

<https://demystifyingscience.com/blog/magnetism>

*In our visualization, which builds upon the work of Bill Gaede, surface-to-surface transmission of e-shell rotation between aligned shells of atoms constitutes electricity.*

5. [What Causes Inertia?](#)

(<https://demystifyingscience.com/blog/2020/2/25/what-causes-inertia> )

No attributions were made despite that the mechanism proposed by defendants consists of a physical mediator that connects any two atoms:

*“**We** reasoned that all physical motions are slowed for one of two reasons: because other objects get in the way or because something pulls on them... Inertia means that all of your atoms are gravitationally entwined with all of the atoms around them... all of the other atoms in your world, including the atmosphere, sun and stars, are indeed exerting some meaningful pull...”*

6. [If Not Amount of Material, What Causes Mass?](#)

( <https://demystifyingscience.com/blog/2020/3/6/where-does-mass-come-from> )

No attributions were made in this page despite that the mechanism proposed by the defendants consists of a physical mediator that connects any two atoms:

*“atoms behave as if they are pulling on one another.”*

*“One way to visualize mass is to imagine atoms connected by an imaginary tensile structure.”*

*“Because all of this tugging (mass) is balanced directionally, equally and oppositely, there is no motion in this tiny universe. However, if we attempt to pluck any one of these atoms from the chain, it will resist inertially due to that web of tensioned connectivity.”*

The images and mechanisms of this last page are practically plucked right out of the plaintiff's [Hubpages gravity page](#) ( <https://hubpages.com/hub/Einsteins-Idiots-12> ) which has been running since 2013.

What is incongruous and perplexing is that in their articles the defendants provide generous attribution to Ernst Mach who never provided a physical mechanism for his [unpublished and off-the-cuff](#) interconnectivity theory, yet even today refuse to credit the plaintiff in any way.

The list continues, since the defendants have peppered several more of their pages with plagiarized material, but the plaintiff must stop here with the most prominent examples so as to not overburden the trier of fact.

What is indisputable is that the notion of a physical mediator that binds any two atoms originates in The Rope Hypothesis (*WGDE*). This physical mediator not only allows torsions to propagate back and forth along its length (*i.e., light*), but also for the first time in the history of Science produces the force of pull that Mssrs. Newton and Einstein desperately searched for (*i.e., gravity*). The plaintiff is prepared to introduce further evidence of plagiarism and copyright infringement by the defendants upon request.
